

QS-Integrator is a holistic quality systems and knowledge management solution which helps organizations in creation, capture, storage, dissemination and analysis of information and comply with various internal and external compliances and standards.

The idea of a Quality Solutions Integrator is to enable employees to have ready access to the organization's documented base of facts, sources of information, and solutions. Puratech's Quality Solutions Integrator offers integrated Quality & Knowledge Management solutions for networks of participants, i.e. active knowledge workers, in knowledge-intensive business processes along the entire knowledge life cycle.
