Maintaining the standards ...

QS-Audit and Corrective Action

QS-Audit a web based Software is an innovative system that allows you to conduct internal and external audits and manage corrective actions with sophisticated closed-loop corrective action system. The external Audits could comprise Auditing your Suppliers, Dealers, etc.

QS-Audit is about making your job easier. Choose the features you need right now, and rests assured that you have a whole new bag of tricks at your disposal when you need it.

QS-Audit was created to provide long-term solutions, not quick fixes. You will not outgrow our system; you will grow into it.

The Criteria section of QS-Audit allows you to document all of your audit checklists for internal and external audits. You may also use the bundled ISO 9001, 9002, 9003 and QS-9000 questionnaires or customize them to meet your internal and external audit requirements.

QS-Audit also allows you to:

- ✓ Attach documents, including work instructions and standards, for auditors to view on-line.
- ✓ Establish timesaving procedure checklists that can be used for both internal and external audits.
- ✓ Corrective action plan for Non-Conformities raised during audit. Plan review audits to measure effectiveness of actions taken.
- ✓ Management Review meeting Log maintenance and training.

Some features of QS-Audit:

- | | |
|---|--|
| <input checked="" type="checkbox"/> Audit Capabilities - This system allows Auditing for only Documents or for documents through Checklists. | <input checked="" type="checkbox"/> Audit Templates
